## Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

NBN-IntelProp@bshg.com

## Advisory Action Before the Filing of an Appeal Brief

Application No.	Applicant(s)	
10/529,002	HAEDICKE ET AL.	
Examiner	Art Unit	

	Andrew J. Rost	3753				
The MAILING DATE of this communication appe	ars on the cover sheet with the c	correspondence add	ress			
THE REPLY FILED 12 April 2010 FAILS TO PLACE THIS APP	LICATION IN CONDITION FOR A	LLOWANCE.				
1. The reply was filed after a final rejection, but prior to or on application, applicant must timely file one of the following application in condition for allowance; (2) a Notice of Apperor Continued Examination (RCE) in compliance with 37 C periods:	replies: (1) an amendment, affidavireal (with appeal fee) in compliance	t, or other evidence, w with 37 CFR 41.31; or	hich places the (3) a Request			
a) The period for reply expires 3 months from the mailing date b) The period for reply expires on: (1) the mailing date of this Ar no event, however, will the statutory period for reply expire la Examiner Note: If box 1 is checked, check either box (a) or (I MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f	dvisory Action, or (2) the date set forth ster than SIX MONTHS from the mailing b). ONLY CHECK BOX (b) WHEN THE ).	g date of the final rejection FIRST REPLY WAS FII	on. LED WITHIN TWO			
Extensions of time may be obtained under 37 CFR 1.136(a). The date of have been filed is the date for purposes of determining the period of extunder 37 CFR 1.17(a) is calculated from: (1) the expiration date of the set forth in (b) above, if checked. Any reply received by the Office later may reduce any earned patent term adjustment. See 37 CFR 1.704(b). NOTICE OF APPEAL	ension and the corresponding amount of hortened statutory period for reply origi	of the fee. The appropria nally set in the final Office	ate extension fee e action; or (2) as

Continuation of 3. NOTE: The proposed amendments present additional claims (claims 29 and 30) without canceling a corresponding number of finally rejected claims. Additionally, the newly prosposed claims (29 and 30) would raise new issues that would require further search and/or consideration (i.e., at least one of the magnetic anchor guide sections directly guides the magnetic anchor in claim 29 and the electromagnetic coil is mounted as a separate component on an outer circumference of the first magnetic anchor guide section in claim 30).

Continuation of 11. does NOT place the application in condition for allowance because: Applicants' arguments filed 4/12/2010 are not persuasive. Applicants argue the rejection of claims 14, 15, 17, 18, 20, 23 and 26 under 35 U.S.C. 102(b) as being anticipated by Laurent (5,145,148) on page 8. It is considered that the mobile magnetic anchor is a combination of elements 20, 26, 54 and 56 (wherein elements 54 and 56 are both part of a pin 38). A portion of the element 54 is received within a depression of the element 20 (see figure 1) wherein element 56 is secured to the outer surface of the element 54. It is considered that the interaction between the outer surfaces of element 56 and the wall of the through-bore provides a guiding section. Additionally, the outer portion of the armature 20 that contains axially extending slots 48 provides a similar guiding section that guides the anchor along the surface of the element that armature is held within. The guiding sections provide a close fit relationship with the inner circumferential surfaces of the element the armature is supported and housing 12 such that the mobile magnetic anchor is able to slide and such that a fluid is premitted to flow through channels 48 and 68.

Applicants argue the rejection of claims 14-18, 20, 23 and 26 under 35 U.S.C. 103(a) as being unpatentable over Kolze et al. (4,697,608) in view of Brehm et al. (5,636,828) on pages 8-9. It appears these arguments were previously addressed in the Office action dated 1/22/2010. In response to applicants' argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicants' disclosure, such a reconstruction is proper. See In re McLaughlin, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). The Brehm et al. reference was relied upon to teach the placement of a sliding bearing (made of metal) in order to ensure that the lower region of the mobile magnetic anchor is guided properly.
